EDUCATION

Stevens Institute of Technology — Hoboken, NJ
Master of Science in Data Science | GPA: 3.73/4.0

Graduated: May 2026

K.J Somaiya College of Engineering — Mumbai, India
B.Tech in Information Technology, with Distinction | GPA: 3.62/4.0

Graduated: May 2024

EXPERIENCE

Data Operations Analyst (Freelance) — Axion24 AI Technologies, Mumbai, India

May 2025 – Present

- Migrating government client data from legacy NIC servers onto AWS and Azure across two projects, replacing an outdated system that suffered frequent downtime; mapping legacy schemas to new structures and validating field integrity after each cutover
- Cleaning and reshaping public records and circulars across **3** languages with SQL and Python, making them reliably queryable by the new sites and AI knowledge assistant
- Building the admin analytics layer for the government site tracking page visits, document downloads, and device usage, giving the board visibility into what citizens and industry use
- Supporting auto-ingestion pipelines so newly published circulars flow into the public-facing tools without manual uploads, helping the team maintain **99%** uptime SLA

Data Analyst (Internship) — Accenture, Mumbai, India

January 2024 – June 2024

- Partnered with a 6-person analytics team on a consumer retail engagement, building sales reporting and short-term revenue forecasts in Python and SQL across product categories and store regions
- Built Power BI dashboards on category-level sales, promo lift, and regional performance, adopted by the client's merchandising leads to plan weekly markdowns and reorder decisions
- Ran scenario analysis on promo and pricing changes, delivering recommendations the client adopted that lifted category revenue by **8%** the following quarter

Data Analyst (Part Time) — Expify, Mumbai, India

June 2022 – October 2023

- Automated the weekly reporting pipeline pulling and cleaning data from Postgres, HubSpot, Google Analytics, and Excel exports using Python and SQL, cutting manual prep from **40 hours a week to under 8**
- Led A/B tests on pricing and checkout flow changes with the product team, defining success metrics, setting stopping rules, and owning the rollout decisions that lifted revenue per session by **15%**
- Built **12** Tableau dashboards on customer lifecycle and segmentation that product and marketing leads used for weekly business reviews
- Wrote SQL runbooks and data dictionary entries for recurring reports, enabling teammates to self-serve common questions without escalating to analytics

PROJECTS AND PAPERS

Analyzing the Global Luxury Resale Market

Data Analysis & Visualization

- Analyzed **25K+** listings scraped from resale marketplaces using Python and SQL; found **30–45%** price premiums for top brands and **50%** price variation driven by listed condition
- Clustered listings by buyer behavior and price band in 10 Tableau dashboards covering brand, condition, and seasonal trends

Forecasting Micro and Macro Economic Indicators with ML

Python • LSTM

- Built LSTM and neural network models to forecast Yahoo stock prices (micro), and Random Forest, Linear Regression, and Decision Tree models to forecast GDP growth and inflation (macro), reaching **~95% R²** on held-out data across both tracks
- Research published and presented at Hinweis International Conference ASIT 2024 (150+ attendees)

SKILLS AND CERTIFICATIONS

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, R, Excel (pivot tables, VLOOKUP, macros)

Analytics: A/B Testing, Hypothesis Testing, Customer Segmentation, Cohort Analysis, KPI Design, ETL, Marketing Analytics

Tools: Tableau, Power BI, Looker, Snowflake, Git, AWS, Azure, Jupyter, Databricks

Certifications: Databricks Certified Data Analyst Associate; Bloomberg Market Concepts; Google Cloud Big Data & ML; IBM Data Visualization; UCSD Big Data; EDA (UIUC); Time Series (DeepLearning.AI)
