EDUCATION

Stevens Institute of Technology — Hoboken, NJ
Master of Science in Data Science | GPA: 3.73/4.0

September 2024 – May 2026

K.J. Somaiya College of Engineering — Mumbai, India
Bachelor of Technology in Information Technology, with Distinction | GPA: 3.62/4.0

July 2020 – May 2024

EXPERIENCE

Business Analyst — Street Care, Remote, USA

August 2026 – Present

- Translated outreach team requirements into **6 KPIs** for service reach and program activity.
- Analyzed **20K+** outreach records with SQL and Python to find demand trends and coverage gaps.
- Built weekly Excel reports for non-technical leads, cutting ad hoc data requests by **25%**.

Data Operations Analyst — Axion24 AI Technologies, Mumbai, India

May 2025 – August 2025

- Validated field-level data integrity across **~300K** records using Python and SQL, reducing downstream data errors by **20%** and improving pipeline trustworthiness.
- Processed **~12K** circulars per month across **3** languages with SQL, Python, and LLM tools (Claude, Gemini), **applying data governance rules** to catch metadata inconsistencies and duplicate records, cutting manual review volume by **~30%**.
- Built an admin analytics layer in Power BI tracking page visits, document downloads, and device usage, giving the board real-time visibility into data quality and platform usage patterns.
- Partnered with ingestion engineers and business stakeholders to define data quality standards for auto-ingestion pipelines, helping the team sustain a **99%** uptime SLA.

Data Analyst — Accenture, Mumbai, India

January 2024 – June 2024

- Partnered with a **6-person** analytics team on a consumer retail engagement, building statistical and quantitative models in Python, SQL, and SAS for sales reporting and short-term revenue forecasts across product categories and store regions.
- Built Power BI dashboards on category-level sales, promo lift, and regional performance, adopted by the client's merchandising leads to plan weekly markdowns and reorder decisions.
- Ran scenario analysis and hypothesis testing on promo and pricing changes, delivering recommendations the client adopted that lifted category revenue by **8%** the following quarter.

Data Analyst — Expify, Mumbai, India

June 2022 – October 2023

- Designed and led A/B tests on pricing and checkout flows, aligning product and engineering on success metrics.
- Recommended rollouts based on test results, lifting revenue per session by **15%**.
- Designed the underlying Postgres schema and automated the weekly reporting pipeline pulling and cleaning data from Postgres, HubSpot, Google Analytics, and Excel exports using Python and SQL, cutting manual prep from **40 hours a week to under 8**.
- Built **12** Tableau dashboards on customer lifecycle and segmentation, adopted by product and marketing leads to drive weekly business reviews and reduce reporting turnaround by **30%**.

PROJECTS AND PAPERS

Forecasting Micro and Macro Economic Indicators with ML

Python • LSTM

- Built LSTM and neural network models to forecast Yahoo stock prices (micro), and Random Forest, Linear Regression, and Decision Tree models to forecast GDP growth and inflation (macro), reaching **~95% R²** on held-out data across both tracks.
- Published and presented research at Hinweis International Conference ASIT 2024 (**150+** attendees).

Analyzing the Global Luxury Resale Market

Data Analysis & Visualization

- Scraped and analyzed **25K+** resale listings using Python and SQL, identifying **~40%** price premiums for top brands and **50%** price variation driven by listed condition, surfacing pricing anomalies and inconsistent seller behavior.
- Clustered listings by buyer behavior and price band, building **10** Tableau dashboards on brand, condition, and seasonal trends.

SKILLS AND CERTIFICATIONS

Analytics: Experimental Design & A/B Testing, Hypothesis Testing, Statistical & Quantitative Modeling, Data Governance, Data Modeling, Data Cleaning & Preparation, Customer Segmentation, Cohort Analysis, KPI Design, ETL.

Machine Learning: LSTM, Random Forest, Linear/Logistic Regression, Decision Trees, Time Series Forecasting.

Programming: SQL (Window Functions, Complex Joins), Python (Pandas, NumPy, Matplotlib, Seaborn), R, SAS, C++.

Tools: Excel (Pivot Tables, VLOOKUP, Macros), Power BI, Tableau, Looker, Snowflake, Git, AWS, Azure, Databricks.

Certifications: Bloomberg Market Concepts; Databricks Certified Data Analyst Associate; Google Cloud Big Data & ML; IBM Data Visualization; UCSD Big Data; EDA (UIUC); Time Series ([DeepLearning.AI](#)).

GenAI & LLM Tools: Claude, Gemini, ChatGPT; used for SQL drafting and review, data summarization, and reporting.
